

Here are some quick facts about our bamboo fabric

Eco-friendly - bamboo grass grows 3 feet per day and is the world's most prolific and fastest growing plant. Renewable and sustainable, Bamboo grows without pesticides or fertilizers that are detrimental to the environment.

Natural moisture wicking ability to make this fabric cooling in summer, warm in winter, and comfortable all year round.

Natural anti-bacterial ability with intrinsic properties that inhibit the growth of bacteria and resist odour wash after wash, wear after wear.

Natural UV resistant ability to help protect against harmful sun rays (always use sun block out in the sun!).
